Flock No. 4188

Poll No. 1109

Greenland is offering Medium Wool Rams, Finewool Rams and Poll Merino Rams in our sale this year. We have retained a specialty Superfine Flock that are traditional 74's & 80's quality and cutting good fleece weights for private selection after the sale.

Greenland was founded in 1985 on Snowy Plain blood ewes.

We formed 3 families of ewes to breed sheep that suit differing environments and specialist flock requirements.

In 1987 we formed a Poll Merino Stud based on Emu Hill ewes to cater for anyone wishing to purchase Poll Merinos.

We believe the ewe base is the most important part for breeding progeny that will breed predictable and repeatable. Greenland has been pedigreeing and performance recording the stud ewes since 1986 enabling us to maintain, predictability, fibre diameter but increase bone, frame, staple length and fleece weights.

Accredited Brucellosis & Footrot free

Anyone wishing to inspect the rams prior to the Sale Day would be most welcome, by contacting us on the above phone numbers.

Conditions of Rams

How the years quickly change with last years draft having 500ml of rain for the 9 month period and this year only 270ml. However they have done well up until July when the Rye Grass paddock they were in diminished with no rain and extreme frosts. We supplemented them with oats & lupins to keep them ticking along. They have been paddock reared with no shedding.

Breeding Objectives

At GREENLAND we are continuously concentrating on improving the genetics to breed a well balanced animal that is correct in structure with good bone on a large frame and yet maintain fibre diameter with supple skins and a rich well nourished distinct crimped wool that performs well in processing and a versatile sheep that are suitable to most environments as well as various options such as sheep that will reach the desired body weight for the meat trade or ewes that are suitable for first cross lamb mothers. Large framed sheep usually create strong competition from restocker interest. Greenland is concentrating on improving these characters which determine net returns to woolgrowers, this enables us to progress far more effectively. The strong demand for sheep and mutton make a merino operation very profitable, Greenland sheep are versatile and are highly fertile & waterproof.

WOOL OBJECTIVES

One of the most important decisions to consider when breeding Merinos is to aim for a well balanced sheep. To do this you must avoid focusing on extreme traits. The best performers for balance is the average or a little above average for all the measurable traits. The ultimate aim at Greenland has always been to breed the very best quality wool as possible. Wool quality is the key to success in eliminating fleece rot and dermatitis. The fibre must have distinct crimp definition with well aligned fibre of white waterproof wool with the correct chemistry. Good quality wool that dries quickly is the answer to dramatically reducing fly strike and thus extremely important as the industry is already experiencing chemical resistance. Good quality wool and micron are key drivers for good competition at the wool sales
