CONDITIONS OF SALE

1. Subject to a vendor's reserve price the highest bidder shall be the purchaser, and in the event of any dispute arising it shall be settled by the auctioneer nominates, and the auctioneer unless one of the claimants will advance in which case the lot or lots shall be put up again. No bidder shall bid a sum less than the auctioneer nominates, and the auctioneer shall have the right to refuse any bid without giving any reason therefore.
2. The purchaser shall deposit the whole or any part of the purchase money if required at any time during the sale.
3. All stock shall be paid for in cash immediately on conclusion of the sale and prior to delivery, but in the event of delivery being made or possession obtained by the purchaser or his representatives prior to payment of the purchase money such delivery of possession shall be pro forma only and until payment is full of the purchase money or any cheque given on account of same the purchaser shall hold the stock as bailee only for the vendor and (not withstanding anything therein to the contrary) no property therein shall pass to the purchaser who shall nevertheless be responsible for the safety thereof. Notwithstanding such delivery or possession payment is due immediately on each lot being knocked down and if payment is not made at the above mentioned time the vendor or his agent shall be at liberty to repossess forthwith and for that purpose to enter upon lands or premises of the purchaser.
4. All stock shall be at the risk and expense of the purchaser upon the fall of the hammer.
5. The vendor reserves the right of making one bid for each lot.
6. All conditions and warranties expresses or implied by law are hereby excluded and as all lots are open for inspection prior to the commencement of the sale the same are sold with all faults, if any, whether visible or not, therefore no compensation shall be made in respect of any faults or imperfections or error of description or number in or of any lots sold or otherwise.
7. If the purchaser shall neglect or fail to comply with any of the above conditions any stock knocked down to him may be resold by public auction or private contract with or without notice at his risk and he will be held responsible for all loss and expense arising out of such resale and shall not participate in the profit (if any) accruing there from.
8. It shall be lawful for the purchaser to authorize the auctioneer and/or the auctioneer's clerk to sign on his behalf the Contract of Sale which shall embody these conditions of sale and on purchaser's behalf to pay or accept responsibility for payment to vendor(s) of the purchase money so that immediately delivery (which shall be pro forma only) may be facilitated. As between vendor, auctioneer and purchase it is agreed:
 - (a) The purchaser shall immediately reimburse the auctioneers all monies so paid or which responsibility has been accepted.
 - (b) Pending such reimbursement the stock are mortgaged and charged to auctioneer to secure such reimbursement and failing such reimbursement the auctioneer shall be entitled to repossess immediately.
 - (c) Without prejudice to any rights powers and remedies the auctioneer shall have all those conferred on a vendor by the preceding clauses.
- (9) Attention is directed to Section 45 and 46 of the Auctioneers, Stock and Station and Real Estate and Business Agents' Act 1941-1957.

Flock No. 4188
Poll No. 1109

Greenland is offering Medium Wool Rams, Finewool Rams and Poll Merino Rams in our sale this year. We have retained a specialty Superfine Flock that are traditional 74's & 80's quality and cutting good fleece weights.

Greenland was founded in 1985 on Snowy Plain blood ewes.

We formed 3 families of ewes to breed sheep that suit differing environments and specialist flock requirements.

In 1987 we formed a Poll Merino Stud based on Emu Hill ewes to cater for Poll Merino breeders.

We believe the ewe base is the most important part for breeding progeny that will breed predictable and repeatable. Greenland has been pedigreeing and performance recording the stud ewes since 1986 enabling us to maintain, predictability, fibre diameter but increase bone, frame, staple length and fleece weights.

Accredited Brucellosis & Footrot free

Anyone wishing to inspect the rams prior to the Sale Day would be most welcome, by contacting us on the above phone numbers.

Conditions of Rams

The Rams have done well this year having run on an improved pasture until June. Then they were put on a paddock of Illabo Wheat and have remained there until now. This winter has been one of the coldest I have seen for many years with a lot of snow in the mountains guarantees very icy winds for the Monaro. Some of the rams were shorn in March with show tags and rest shorn in April.

Breeding Objectives

At GREENLAND we are continuously concentrating on improving the genetics to breed a well balanced animal that is correct in structure with good bone on a large frame and yet maintain fibre diameter with supple skins and a rich well nourished distinct crimped wool that performs well in this processing and a versatile sheep that are suitable to most environments as well as various options such as sheep that will reach the desired body weight for the meat trade or ewes that are suitable for first cross lamb mothers. Large framed sheep usually create strong competition from restocker interest. Greenland is concentrating on improving these characters which determine net returns to woolgrowers, this enables us to progress far more effectively. The strong demand for sheep and mutton make a merino operation very profitable, Greenland sheep are versatile and are highly fertile & waterproof.

WOOL OBJECTIVES

One of the most important decisions to consider when breeding Merinos is to aim for a well balanced sheep. To do this you must avoid focusing on extreme traits. The best performers for balance is the average or a little above average for all the measurable traits. The ultimate aim at Greenland has always been to breed the very best quality wool as possible. Wool quality is the key to success in eliminating fleece rot and dermatitis. The fibre must have distinct crimp definition with well aligned fibres of white waterproof wool with the correct chemistry. Good quality wool that dries quickly is the answer to dramatically reducing fly strike and thus extremely important as the industry is already experiencing chemical resistance. Good quality wool and micron are key drivers for good competition at the wool sales.

Very productive sheep come out on top for Byrne Farm Company. At Cootamundra Show Society Maiden Merino Ewe Competition. Scott Byrne, Byrne Farm Company, Wallendbeen, took home the top prize with a run of 1100 Greenland– blood ewes. Judges Brad Wilson and Glen Rubie described the Byrnes’ flock as “very Productive sheep”. Brad said, “You can see hes’s obviously classed for wool cut, because the production on them is very good. You’d go a long way to find sheep that cut the amount theses do.” When opening the wool, Glen said the fleece was soft, dense and a beautiful white wool. “For micron and wool cut, you’re kicking goals.” The Byrne’s flock recorded a fibre diameter of 18.8micron with an average fleece weight of 6.7kg with 11 months wool growth. In 2024, they joined 2060 ewes to Merino sires with 2250 lambs weaned. Scott said, after concentrating on wool production, they were now focusing on improving the fertility of their flock.
